

EyeGuard Services

Cyber Security Operations Center

EyeGuard offers you 24/7 visibility of malicious activity across all your internet-facing assets. Expert security analysts investigate anything suspicious; and a task-force is on-hand to respond to security incidents.

“

EyeGuard lets you monitor your critical assets in real time. EyeGuard also includes management and support of your security devices, at a service level to match your needs.

”

Customer challenges

Cyber incidents are becoming a daily reality for organisations. Excellium has designed EyeGuard to address the following points :

- The lack of IT security skills and resources in organisations,
- Control operational cost, improve visibility, enhance security and reduce risk,
- Monitor critical assets availability and integrity in real time,
- Define efficient incident handling to deal with data breaches,
- Quickly identify and understand signs of potential malicious activities,
- Define correlation use cases and cyber defense strategy to mitigate the threat's impact,
- Addressing compliance requirements.

Our approach

Handling incidents in an organisation needs the involvement of different business units. A formal plan with skilled personnel is a must for an efficient Incident Response Service. Therefore EyeGuard includes :

- Evaluate and prepare your incident response plan,
- Train your team to understand current security challenges,
- Connect your infrastructure to Excellium via connection kit and encrypted link,
- Define Service Level Agreements (SLA), responsibility assignment matrix (RACI) and contacts for escalation,
- Put in place 24/7 internal / external security monitoring and management based on your existing SIEM or Excellium's shared SIEM,
- Escalate only relevant incidents after analysis,
- Provide executive and operational reporting.

eyeGUARD services Benefits

Subscribing to EyeGuard Services will help you in:

- Security Policies & Procedures,
- Extending your security and operation team with our EyeGuard team,
- Controlling operational cost thanks to our fixed price offer
- Recognizing cyber threats and responding in a timely manner according to the Service Level Agreement,
- 24/7 advanced and proactive monitoring based on defined and dedicated SLAs to protect your critical assets,
- Challenging your infrastructure with external vulnerability scans and Distributed-Denial-Of-Service tests (DDoS),
- Continually developing the ability to leverage threat intelligence from past incidents and information-sharing sources,
- Regularly testing your email and web security policies through our state-of-the-art technology and analysis tools

SECURITY SKILLS

We are passionate security specialists and pioneers, and with more than 15 years' experience, we can handle even sophisticated threats and attacks.

SUPPORT MAJOR SECURITY VENDOR

EyeGuard leaves you free to use any security products, without being tied to specific vendors. Our highly skilled security analysts hold industry recognized certifications for most popular kinds of SIEM, as well as a wide range of security products such as IBM QRadar.

INTELLIGENCE

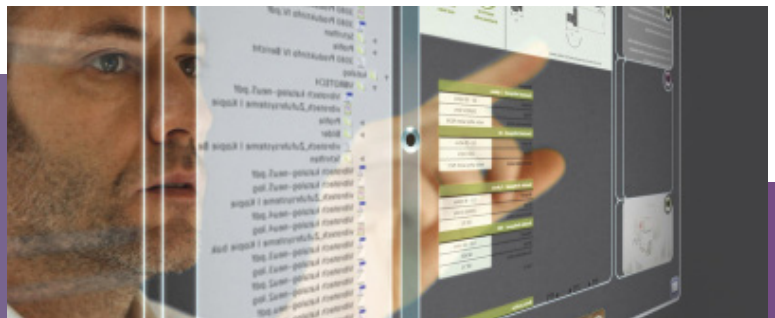

Get Indicators of Compromise (IoC) pushed onto your SIEM, in near real-time, thanks to our Malware Information Sharing Platform (MISP) and our CSIRT.

EVOLUTION

We are constantly developing tools to find vulnerabilities in your infrastructure, and we can help to find weaknesses in your existing email and web filters.

RAPID DEPLOYMENT

We can deploy our solutions quickly in your environment, with minimal disruption.

services provided

EyeGuard Services, the commercial brand of our SOC as a Service offering deliver the following services :

- Responding to audits with detailed and custom reports,
- Providing use cases based on your assets, informed by our experience, and updated as we continually adapt to new malware,
- Incident handling, threat management and remediation assistance, with initial forensic analysis when required,
- Get "up to date" security alerts from our CSIRT and associated services (like malicious domain take down),
- .Advanced monitoring capability, with user simulation to validate your application.
